

## **Exercise for the Topic Mailing 20 points (!)**

Use Thunderbird in your RISC CBWE account to read your emails at this account.

### **1. Create accounts in Thunderbird with the following configuration: ( 6 points)**

- create two email accounts
  - one for reading the emails by imaps
  - another email account for reading the emails by pop3s,
- by creating the email account configure the following setting:
  - by the Server Information window unmark the field:  
Use Global Inbox ( store mail in Local Folders)
- set the outgoing mail server to smtpauthhost.risc.uni-linz.ac.at  
(this server needs authentication: your RISC CBWE login and password will be asked, the connection is ssl based)
- send the outgoing emails by Bcc: to your RISC CBWE account
- create two signature files
- create a vcard
- create the following 8 folders:  
Debian, Networking, Mailing, SSH, Images, Presentation, Openoffice, Drawing

### **2. Setup some filters: ( 4 points)**

- each email with the subject of a topics (as listed above) has to be moved to the appropriate folder.

Check the setup:

- send at least 8 emails to your RISC CBWE account with the different topic names in the Subject and check, whether the filters work correctly.

Inform me per e-mail, if you finished the above settings, I'll send you some test emails.

### **3. Create screen shots about the configuration of the email accounts: (4 points)**

- a- Thunderbird start page, where I can check the list of both email accounts and their folders
- b- for both email accounts:
  - Account settings <account name>
  - Server Settings
  - Copies and Folders
  - Outgoing Server

c- signature  
d- vcard

**4.** Create a Latex Beamer presentation about the configuration of Thunderbird: (6 points)

1. Title frame:
  - Thunderbird configuration
  - your name
  - logo: your photo
  
2. Following frames:
  - four frames (Thunderbird start, vcard, 2 signatures, i.e.: 3a, 3c, 3d) with the screenshots made in **3**.
  - For both email accounts the four setting ( 3b, 8 frames) with the screen shots made in **3**.

Put the presentation into your RISC home directory:

`/home/<yourlogin>/exercises/exercise-mailing.pdf`

Put the source latex file of the presentation to this directory as `exercise-mailing.tex`

For this exercise you will get max. 20 points (not the default max. 10).

Deadline: January 17, 2010.
